DECENTRALISE

Winter mute has designed this system with an algorithm where whatever is invested in the system is automatically moved to arbitrage. Where trades are automatically done in arbitrage trading. The arbitrage decentralized highly secure software ensures that 50% of the daily profit is transferred to DSGT and 50% is retraded in arbitrage trading. This system is not under the control of any individual person or community. All work is operated automatically through a highly secure decentralized software.

SECURE

DSGT and arbitrage trading both system fully highly secure decentralized system. Design by Wintermute who already working from 8 years developing highly secure decentralized software and block chain. Arbitrage trading is done on the difference in the price of top 20 coins on top ten crypto exchanges of the world. Buying the coin from the exchange which has the lowest price and selling it on the other exchange where the price is highest. This process happens within nano second where the risk is zero percent. In other words it is called 100% risk free trade.

GOOD PROFIT

Daily profits from arbitrage trading are 2-3%. Here the client gains 400% in 730 days and the associate gains 200% in 200 days
